

# EnviroCentre Retrofit Accelerator

**It's never been more important for building owners and operators to invest in green retrofits.**

It's also never been easier. EnviroCentre supplies free expert services to guide multi-family building owners in eastern Ontario through the deep energy retrofit process.

## KEY RETROFIT TECHNOLOGIES

- Ground and Air-Source Heat Pumps
- Solar PV
- LED Lighting
- Air Sealing and Weatherization Measures
- Insulation
- EV Charging
- High Performance Windows
- Fuel-switching
- Ventilation
- Smart Thermostats and Energy Management System

**TELL US ABOUT YOUR PROJECT**

## BENEFITS

**Improve efficiency, operations AND housing**

### For building owners

Improve efficiency and reduce operating costs

Increase resident health and comfort

Future proof and grow market value

### For eastern Ontario

Reduce carbon emissions and build climate resilience

Ensure quality housing and create good local jobs

Reduce air pollutants from burning fossil fuels

# Free envirocentre Services

Technical and financial guidance through the deep energy retrofit process.

EnviroCentre collaborates with building owners, utilities, governments, residents and stakeholders to minimize project friction and maximize your health, social, environmental, and economic impacts.

## PLAN

### Fundraising and Financing Facilitation

Facilitate access to funding, financing and grants.

- Co-funding feasibility studies and audits
- Streamline access to public funding
- Innovative financing structures
- Funding application support

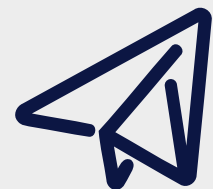

## DELIVER

### Procurement and Project Management Support

Plan and coordinate project delivery for building owners.

- Standardize project delivery and procurement to reduce costs.
- Review and quality assurance of design and construction materials
- Technical and communications support
- Engage residents collaboratively

## MEASURE

### Measurement and Verification (M&V) Reporting

Maximize health, social, and economic outcomes.

- Streamline government reporting
- Support for commissioning and troubleshooting
- Pre and post-retrofit surveying
- Support for broad market development
